

WTR-250 2.1 Channel 5.8 GHz Wireless Transmitter / Receiver Amplifier for Rear Surround Speakers

Product ID: WTR-250

Short Description

5.8G wireless digital transmission
Built-in 2x50W amplifier (receiver)
With subwoofer output

Description

Say goodbye to cumbersome cables and enjoy the convenience of wireless audio transmission. Our 5.8 GHz digital wireless technology ensures a stable, interference-free connection for your rear surround sound system speakers.

Enhanced Surround Sound:

Transform your home theater into a cinematic masterpiece. This amplifier delivers crisp and clear audio, immersing you in the action and ambiance of your favorite movies, games, and music.

Easy Setup:

Effortless installation allows you to start enjoying your upgraded audio setup in minutes. Simply connect the transmitter to your audio source and the receiver to your rear speakers, and you're ready to go.

Versatile Compatibility:

Whether it's your home theater system, gaming console, or music player, our transmitter/receiver amplifier is compatible with a wide range of audio sources, making it a versatile addition to your entertainment setup.

Compact and Stylish:

The sleek design seamlessly blends with your existing audio equipment while saving space. Its compact size ensures it won't clutter your entertainment center.
